

CONCEPTUAL CONFLICT

Felino Soriano

The doubter pushed his blanket of
behavioral thought
atop most worded matter.
Systematically within chiseled
thesis spoke regarding
his tongue lashing about truth,
truth from the human
ascertained as actual antithesis,
or, interpretation of renamed
manifestation, a newly clothed
thought reborn and repositioned
inside a light now covering dust
of the other side of darkness. The
doubter proclaimed what was spoken
unraveled as to an actual unreality,
a subjective spoken display
of bird species ramming its head against
the cliff of unknowing its natural bodily
dispositional gift.
